Senior software engineer with expertise in system architecture and scalable solutions

Results-driven senior software engineer with eight years of experience developing and optimizing large-scale applications. Skilled in cloud computing, microservices, and team leadership. Passionate about designing efficient, high-performing software solutions.

Professional Experience

March 2020 - Present

Senior Software Engineer

CloudTech Innovations | San Francisco, CA

- Designed and deployed microservices architecture, improving system scalability by 30%
- Reduced server downtime by 45% through proactive monitoring and performance optimization
- Lead a team of five developers, mentoring junior engineers and overseeing project timelines

July 2016 - February 2020

Software Engineer

DataWorks Inc. | San Jose, CA

- Developed scalable APIs, improving system response time by 35%
- Automated CI/CD pipelines, reducing deployment failures by 60%
- Refactored legacy code, increasing code efficiency by 25%

Education

Master of Science in Software Engineering

Stanford University | May 2016

Key Skills

Java, Python, C++

Microservices architecture, Kubernetes, Docker

AWS, Azure, Google Cloud

Agile methodologies, team leadership
