Python data scientist building scalable machine learning models

Experienced Python data scientist with seven years of experience in statistical modeling, machine learning, and data visualization. Expert in using Python libraries for big data analytics and predictive modeling.

Key Skills

- ● ● ● ● Python (Pandas, NumPy, Scikit-learn, TensorFlow)
- ● ● ● ○ Data cleaning and preprocessing
- ● ● ○ ○ Predictive modeling and forecasting
- ● ○ ○ ○ Big data analytics
- ○ ○ ○ ○ API development and data integration

Professional Experience

Python Data Scientist

CloudData Solutions | Seattle, WA | April 2020 - Present

- Developed a predictive analytics model that increased forecasting accuracy by 30%
- Built an ETL pipeline using Python, reducing data processing time by 50%
- Deployed machine learning models on AWS, improving cloud-based analytics efficiency

Data Analyst (Python Developer)

NextGen Tech | San Francisco, CA | July 2017 - March 2020

- Automated data cleaning processes using Python scripts, reducing manual labor by 40%
- Developed a recommendation engine that improved product sales by 25%
- Designed interactive dashboards using Matplotlib and Seaborn for data visualization

Education

Bachelor of Science in Computer Science
University of Washington, Seattle, WA | May 2017
