## Senior Software Engineer Focused on Scalable Architecture and High-Performance Systems

Results-driven software engineer with nine years of experience building complex applications and leading full-stack development projects. Skilled in designing scalable systems, mentoring junior engineers, and optimizing performance across cloud-based infrastructures. Adept at delivering robust code that improves system reliability and drives business growth.

---

## Professional Experience

### Senior Software Engineer

Atlas Cloud Solutions, San Francisco, CA

March 2020 - Present

- Led development of a distributed data platform that scaled to support a 400% user growth, reducing system latency by 60%
- Architected a microservices migration from monolithic infrastructure, improving deployment efficiency and reducing incidents by 35%
- Mentored five junior developers, increasing team velocity by 25% and reducing code review cycles by 40%

### Software Engineer

DevCore Technologies, Oakland, CA

June 2015 - February 2020

- Developed and maintained APIs used by over 1 million monthly active users across mobile and web applications
- Reduced cloud infrastructure costs by 30% through resource optimization and serverless implementation in AWS
- Implemented automated test coverage using Jest and Cypress, decreasing post-deployment bugs by 50%

---

## Key Skills

- API development
- Cloud architecture
- JavaScript
- Microservices
- React
- System design

---

## Education

**Bachelor of Science (B.S.) Computer Science** March 2015

University of California, Davis, Davis, CA

---

## Certifications

**AWS Certified Solutions Architect – Associate**

August 2021

**Scrum Master Certified (SMC)**

September 2019
