- Front-end state management (Redux)
- Git and GitHub workflows
- JavaScript and TypeScript
- MongoDB and Mongoose
- Node.js and Express
- Performance optimization
- React component development

Education

Bachelor of Science (B.S.) in Computer Science
Northeastern University | May 2018

React full stack developer with five years of experience building interactive front-end applications and scalable back-end services. Skilled in TypeScript, React, Node.js, and cloud-based deployment. Adept at improving UI responsiveness, implementing secure APIs, and collaborating in agile teams.

Professional Experience

Full Stack Developer
ArcByte Technologies, Boston, MA | March 2021 - Present

- Developed and deployed React apps for SaaS clients, boosting engagement metrics by 28% across user dashboards
- Integrated RESTful APIs using Node.js and Express to support real-time functionality
- Reduced UI load time by 45% by refactoring code and implementing lazy loading
- Participated in weekly agile sprints and led front-end planning sessions for a four-person team

Software Engineer
PixelForge Media, Providence, RI | June 2018 - February 2021

- Built internal tools and client dashboards using React, Redux, and MongoDB
- Created modular front-end components to standardize design across multiple apps
- Maintained CI/CD pipelines using GitHub Actions, reducing release errors by 40%

Certifications

- React Developer Certification | Udacity | 2022
- AWS Certified Developer – Associate | Amazon Web Services | 2021
