name

MERN stack developer with over five years of experience designing and deploying full stack web applications using MongoDB, Express, React, and Node.js. Skilled in agile development, component-based UI architecture, and database performance tuning.

Key Skills

- Component-based React development
- Express.js routing and middleware
- JavaScript (ES6+ and JSX)
- Mongoose and MongoDB performance tuning
- Node.js backend logic
- REST API creation
- State management (Context, Redux)
- UI library integration (Material UI, Bootstrap)
- Version control (Git, GitHub)

Education

Bachelor of Science (B.S.) in
Computer Science
University of Illinois at
Chicago | May 2018

Professional Experience

Full Stack Developer (MERN)

CoreLogic Web Studio, Chicago, IL | May 2021 - Present

- Developed modular React front-end applications integrated with Node.js and MongoDB backends
- Created reusable components and hooks, reducing front-end development time by 40%
- Refactored backend services to use Mongoose with indexed queries, decreasing database latency by 30%
- Built internal admin dashboards with role-based access control

Web Developer

FreshNet Media, Naperville, IL | July 2018 - April 2021

- Maintained client websites using the MERN stack and RESTful APIs
- Designed customer-facing forms and account systems with client-side validation and state management
- Created documentation for setup, deployment, and feature integration

Certifications

- Full Stack Web Development with React | Coursera (Hong Kong University) | 2021
- MongoDB Developer Certification | MongoDB University | 2020
