Public Health Data Analyst With 6 Years of Experience Supporting Community Health Initiatives and Epidemiological Research

Experienced in collecting, analyzing, and interpreting health-related data to guide public health policies and outreach programs. Skilled in statistical tools, population data analysis, and health equity metrics. Passionate about using data to improve community well-being.

Professional Experience

Public Health Data Analyst, Brooklyn Health Department, Brooklyn, NY
May 2020 – Present

- Analyze community health trends using SPSS and SQL to produce reports for grant proposals and health interventions
- Build dashboards tracking vaccination rates, maternal health, and chronic illness indicators across boroughs
- Collaborate with public health officials to identify target populations and optimize outreach strategies

Health Data Analyst, Northeast Health Coalition, Queens, NY
July 2017 – April 2020

- Compiled and cleaned regional health data sets to assess disparities in care access and health outcomes
- Used GIS mapping tools to visualize food deserts and transportation barriers impacting care delivery
- Supported quarterly research publications and internal presentations with data tables and visualizations
